apollo | X Gen 2

The best sounding Apollo yet.

Next-generation A/D and D/A converters with lowest distortion and widest dynamic range

Get the authentic sound of analog with updated UAD plug-in bundles

High-speed TB3 connectivity macOS and Windows

Realtime recording through Unison™ preamp and guitar amp emulations

Apollo Monitor Correction for speakers and headphones, powered by Sonarworks®*

Link up to 4 Apollos with full studio monitor control including talkback, 128 I/O, and more

---

All models include award-winning software.

- Antares Auto-Tune Realtime Access or X
- PolyMAX Polyphonic Synth
- Century Tube Channel Strip
- Teletronix LA-2A Leveler Collection
- Pultec Passive EQ Collection
- Pure Plate Reverb
- Galaxy Tape Echo
- Oxide Tape Recorder
- Verve Analog Machines Essentials
- LUNA Digital Audio Workstation, offering *Accelerated Realtime Monitoring* and analog sound at the speed of light with Apollo interfaces
- Updated UAD Console app, and more

Class-leading new features offer effortless workflow and better mix translation.

- **Auto-Gain** for inputs, so you never miss the take
- **Bass Management** for subwoofer integration
- **Apollo Monitor Correction** lets you apply **Sonarworks SoundID Reference** profiles to UA's precision EQ filters running in realtime on Apollo DSP – for *both* main monitors and headphones – so when you listen to your final mix or master there will be no surprises*

*Apollo Monitor Correction feature coming Q4 2024.
Also available for Apollo X Gen 1 customers at sonarworks.com.
Hear the details like never before.

Choose between Essentials+ Edition base models, or upgrade to Studio+ and Ultimate+ Editions for the best value in UAD plug-ins. Put the authentic sound of the stars in your studio.**

The heart of your studio.

Assistive Auto-Gain for effortless recording.

Set input gain automatically with assistive Auto-Gain across multiple channels at once within seconds, so you never miss the take.

Auto-Gain works for Mic, Line and Hi-Z inputs plus select Unison™ preamps from API, Neve and SSL.

Bass Mangement for subwoofer integration.

Hear all the low-end detail in your mixes by using bass management to add a subwoofer to your monitor setup.

Manage subwoofer integration for stereo 2.1 to immersive 9.1.6 Atmos systems with realtime DSP crossover, adjustable Linkwitz-Riley filter frequency and slope.

Apollo Monitor Correction for perfect mix translation in stereo or immersive.*
Mix with confidence in any room or headphones using Apollo Monitor Correction powered by Sonarworks®.

Apollo Monitor Correction offers simultaneous realtime DSP correction for main monitors and headphones, providing professional monitor controller performance, with over 20 precision correction filters and best-in-class SoundID Reference integration for Apollo X interfaces.

*Feature coming soon, Q4 2024.

UAD Console brings low-latency realtime workflows to your studio with **Plug-In Scenes**, **Channel Strip Presets**, **Talkback** for talent communication, **Alternate Monitoring**, and more.
